

ONPOINTE FOR FILE SHARES

Address Risk, Increase Leverage

BENEFITS

STREAMLINED PROCESSES

Advanced automation helps evaluate stored content for value, remove ROT based on your policies, further increase response efficiency, improve eDiscovery cost predictability and reduce business disruption.

STORAGE MANAGEMENT

Using cloud-based storage for large volumes of archived content frees up expensive on-premises media, helping enterprises reduce storage while lowering administrative costs.

SCALABILITY AND CAPACITY

Seamlessly support growth and expansion with hundreds or thousands of users and petabytes of content without compromising system performance.

MINIMIZED BURDEN ON IT

Reduce time required for administration, upgrades, support, backups and storage optimization as well as records retention and eDiscovery support, allowing IT resources to focus on more strategic initiatives that have bottom line impact.

IMPROVED PRODUCTIVITY

Increase end user productivity through improved user access to content via centralized management and advanced search tools.

COST EFFECTIVENESS

Minimize upfront investments in hardware, software, installation and maintenance to deliver a lower total cost of ownership (TCO) for your organization.

New hosted services and traditional collaboration continue to represent enormous governance challenges that demand immediate management attention.

In an attempt to gain greater control over documents and data, some users have turned to services like Box, Dropbox™ and Google Docs™, which can add to the existing chaos of content stored on file shares and in SharePoint®. This unmanaged content resides at the periphery of your information governance control where it is difficult to find valuable business content, potentially relevant litigation information, or sensitive information resulting in risks and liability.

OnPointe® can address a full range of legal, regulatory, business and storage challenges. OnPointe for File Shares brings governance and control to what has been considered the “wild west” of information management and helps you proactively address unmanaged collaborative content that has been stored and ignored or mishandled. To help enforce compliance and improve storage efficiency, business content stored on network drives, file shares, desktops, laptops and collaborative sites such as SharePoint can be evaluated for business value and sensitivity, archived and classified based on your corporate policies. OnPointe’s information governance capabilities allow organizations to leverage valuable content while defensibly disposing of ROT- redundant, outdated or trivial content- to help ensure that you meet your obligations while increasing storage efficiency.

Helping you take control of your content, this unique and comprehensive solution can help protect you from the costs and risks associated with unmanaged data, unfettered disk storage and reactive IT assignments that can negatively affect your bottom line.

“

Organizations are struggling with uncontrolled data growth. Risk-aware and cost-conscious organizations realize they need a better understanding of their data.

Gartner

FEATURES

CENTRAL ARCHIVE

Store over 1,000 file types including office documents, collaborative content, XML data, legacy file types, email, PST and NSF files, mobile records, audio, video and social content.

MAINTAIN DATA FIDELITY

Migrate content to the cloud with complete capture of data, even custom content metadata and permissions.

VERSIONING

Maintain an accurate history of changes to a specific SharePoint file, rather than just the most recent copy.

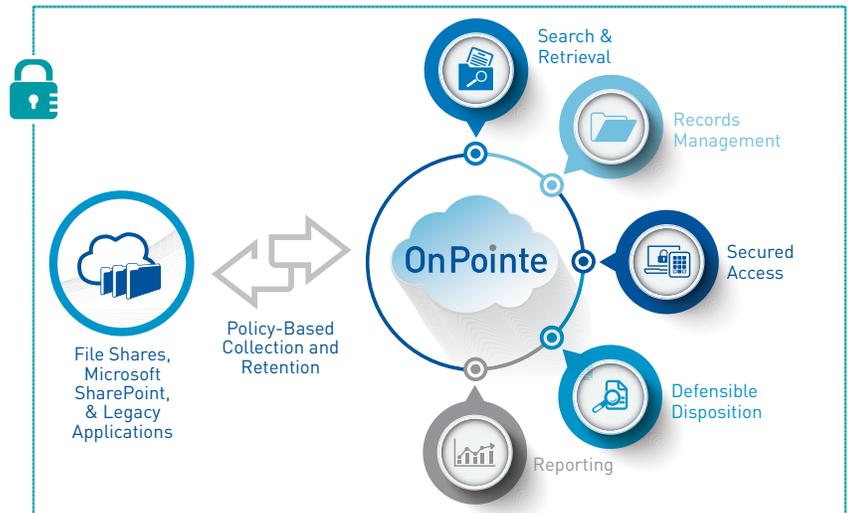

MAXIMIZED SEARCHABILITY

Parallel indexing provides rapid ingestion and index rebuilds for full search access to relevant content.

RECORDS AND RETENTION MANAGEMENT

Policy-based records and retention management provides a highly granular rules engine. Establish policies based on content, file characteristics, event-based triggers and special circumstances like targeted legal holds.

VALUE OF VIEWPOINTE

EXPERIENCE

With one of the most trusted and proven managed cloud archives in the United States, Viewpointe® has been a selected provider to many of the nation's largest, most complex companies since 2000.

COMPREHENSIVE SOLUTION

OnPointe is the unique combination of hardware, software and expertise that leverages best-in-class security, content management, retention management, archiving, analytics and eDiscovery technologies to harness information value.

SECURE CLOUD

Customer data is securely stored and managed in our geographically dispersed, Tier 3+ IBM data centers to help ensure data protection and business continuity. Our services undergo an annual SOC-2 review.

CUSTOMIZED SERVICE

Viewpointe Professional Services consultants work with you to create a solution that meets and grows with your needs, providing comprehensive professional services to enable continual system effectiveness, data integrity and rapid deployment.

COST MANAGEMENT

With our consumption-based model and sophisticated information management and storage solution, Viewpointe helps you better predict and control costs.

DEDICATED SUPPORT

You have access to our information governance, system and infrastructure expertise to assist with system configuration, optimization and ongoing maintenance.
