

# ONPOINTE FOR PRINT STREAM & IMAGE

## High-Volume Output Solution

### BENEFITS

#### LEGACY SYSTEM MODERNIZATION

Replace aging systems and infrastructure to provide enhanced functionality like lifecycle management, legal hold, reporting, search and retrieval to better respond to both customer and regulatory demands.

#### COST EFFECTIVENESS

Minimized upfront investments in hardware, software, installation and maintenance help deliver a lower total cost of ownership (TCO).

#### SCALABILITY AND CAPACITY

Enterprise-wide scalability seamlessly supports growth and expansion with hundreds of thousands of users and petabytes of information – without compromising system performance.

#### IMPROVED SERVICE

Increased flexibility and improved information access help you continue to meet the evolving expectations of your most valuable customers.

#### LEGAL DEFENSIBILITY

Governance policies can be applied to all information, including customer correspondence, helping you meet legal, regulatory and business requirements via a proactive governance approach.

Today's financial organizations face the daunting task of maintaining aging systems designed for the long-term retention of computer-generated reports and multiple types of customer documents like lending documents, bank account/credit card statements, invoices, tax forms and scanned images like customer correspondence and checks.

In the midst of updating back-office archiving capabilities and creating enterprise content management strategies, you must now also tackle a lengthy new list of requirements around compliance, security, litigation support and the overall governance of information.

As the desire to move to a paperless environment has increased, so has the demand on organizations' online billing, payments and e-delivery infrastructure. Providing personalized, responsive and secure online customer experiences have become imperative. The technical infrastructure needed to support this growing demand calls for new processing technology with greater storage capacity, higher availability and reliability, and tighter security and governance controls.

#### SECURE AND COST EFFECTIVE GOVERNANCE FOR HIGH-VOLUME

OnPointe® can address a full range of storage, business, legal and regulatory challenges that can help you better manage high-volume output and meet growing requirements for on-demand access to that information. OnPointe for Print Stream and Image helps you advance your high-volume and document output capabilities to meet customer, compliance, legal and even green, digital and consolidated customer view initiatives within your business.

“

High-volume report archiving for better management and governance of customer statements, invoices and other transactional reports.

# FEATURES

## DATA TRANSFORMATION

OnPointe transforms print streams and line data formats – for both bulk extraction and ad-hoc retrieval from variable line length, fixed line length, ASCII, EBCDIC or AFP formats into standard PDF or standard text for on screen access and viewing.

## BEST-IN-CLASS INFRASTRUCTURE

Viewpointe® currently operates multiple geographically-dispersed, Tier-3+ IBM data centers that have been trusted by many of the nation's top-tier financial institutions for years. Our services undergo an annual SOC-2 review.

## UNIFIED ARCHIVE

Our information governance solution can store and index all types of electronic information. This includes high-volume AFP print streams with embedded TLE records, back office reports, line data and scanned images such as checks, invoices and confirmations.

## ON-DEMAND ACCESS

End users can securely and quickly access their information via web browsers and mobile devices for on-demand viewing.

## FLEXIBLE STORAGE

Support is provided for encrypted data, tiered storage and retention control.

## ADVANCED LIFECYCLE MANAGEMENT

Centralized archive and automation tools help you consistently and transparently apply classification, value-based retention and legal hold policies to individual records for full lifecycle management and improved governance.

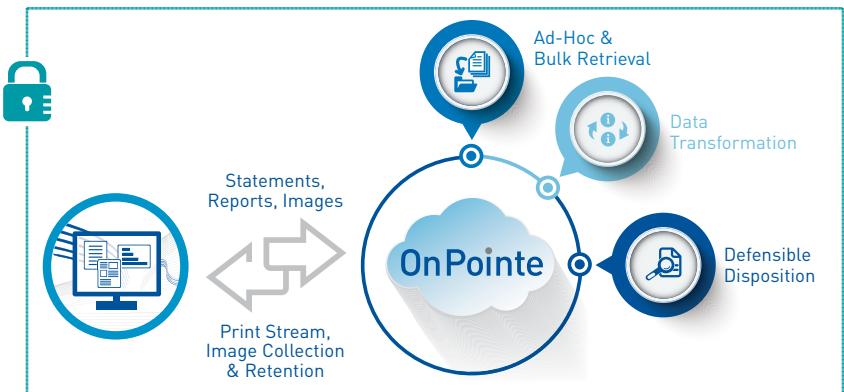

## CUSTOMIZATION

Easily integrate existing business processes and applications.

## REPORTING

Advanced audit and reporting capabilities help your organization meet stringent regulatory and legal requirements such as HIPAA, FINRA and others.

# VALUE OF VIEWPOINTE

## EXPERIENCE

With one of the most trusted and proven managed cloud archives in the United States, Viewpointe® has been a selected provider to many of the nations largest, most complex companies since 2000.

## COMPREHENSIVE SOLUTION

OnPointe is the unique combination of hardware, software and expertise that leverages best-in-class security, content management, retention management, archiving and analytics to harness information value.

## SECURE CLOUD

Customer data is securely stored and managed in our geographically dispersed, Tier 3+ IBM data centers to help ensure data protection and business continuity. Our services undergo an annual SOC 2 review.

## CUSTOMIZED SERVICE

Viewpointe Professional Services consultants work with you to create a solution that meets and grows with your needs, providing comprehensive professional services to enable continual system effectiveness, data integrity and rapid deployment.

## COST MANAGEMENT

With our consumption-based model and sophisticated information management and storage solution, Viewpointe helps you better predict and control costs.

## DEDICATED SUPPORT

You have access to our information governance, system and infrastructure expertise to assist with system configuration, optimization and ongoing maintenance.
