

IS YOUR MAINFRAME HOLDING BACK MODERNIZATION AND TRANSFORMATION?

**EVEN WHEN DEALING WITH
SENSITIVE INFORMATION
companies seek speed in
their applications to satisfy
customer demands.**

To meet these expectations, business applications must present the relevant information to users in a timely fashion and in a meaningful context.

UNFORTUNATELY, some key large enterprise content is marooned on mainframes making it **difficult to integrate and display in conjunction with data and content from other platforms.**

MAINFRAMES REMAIN A PROVEN, STABLE ENVIRONMENT:

Process more than
three trillion dollars'
worth of transactions
each day.

Almost **THREE-QUARTERS** of all
enterprise data resides on mainframes

More than **70 percent** of
Fortune 500 companies
locate core business
on mainframes

BUT...

**Dependence on mainframes can result
in a **SLOWER ABILITY** to adopt new
technologies, transform business processes
and evolve the customer experience.**

MAINFRAME APPLICATION KNOWLEDGE IS IN DECLINE.

Your enterprise is at risk of falling behind, or worse, getting completely left behind.

**AS ORGANIZATIONS PUSH THROUGH THEIR
JOURNEY TO DIGITAL TRANSFORMATION,
the challenges surrounding their mainframe
platforms remain unsolved.**

**THREE ISSUES CAN DERAILED
DIGITAL TRANSFORMATION
IN A MAINFRAME-BASED
ORGANIZATION:**

Integrating Mainframe Systems With Newer Technology

The siloed design of mainframe systems limits cross-platform collaboration and does not match the demand of real-time data required in today's environment. Mainframe-connected APIs are still not readily available to facilitate interconnectivity of technology.

Budget Risks Due to Unpredictable, Surprise Charges and Lack of Performance Optimization

Mainframe expenses represent
up to 40 percent of companies'
IT budgets.

Diminishing Skilled Workforce

Mainframe organizations have lost 23 percent of their mainframe workforce in the last five years and have only been able to replace one out of every three experts lost, according to a Forrester Study.

To get the most from the journey to modernization,

**ENTERPRISE ORGANIZATIONS
MUST CONSIDER A PATH TO CLOUD**

for critical business services
and applications.

VIEWPOINTE CAN HELP ORGANIZATIONS BREAK DOWN SILOS

and strategically address mainframe system modernization with a migration to on-premises infrastructure or hosted private cloud.

VIEWPOINTE'S ONPOINTE FOR PRINT STREAM & IMAGE SOLUTION allows organizations to rapidly address cloud-to-cloud interconnectivity, system consolidation and mainframe retirement scenarios.

Significant Savings Through Efficiency
Lowered Operating Expenses
Improved Overall Performance

**BEST OF ALL,
IT OFFERS FUTURE-PROOFED
PRICE PROTECTION**

through a multi-year license, with set monthly payments and SLA-backed performance.

Focus not just on meeting the business demands for today
BUT FOR TOMORROW AS WELL.

How do you meet the mandates of fast delivery, scale and flexible application management?

You establish a flexible solution that provides the freedom to continue to evolve as your customer demands and market shift. Learn more today.
